

Canaseraga Central School District
Water Testing Results
October 2016.

The information included in this report detail the laboratory results from water samples taken from locations in the school district building. Any sample results with a reading of greater than **0.015** signifies a lead content beyond the NYS approved limit for school districts. We will be working to diagnose the problem areas and will be taking steps to replace piping and / or fixtures in the problem areas. This will be a long process in some cases. We are also required to take follow-up samples once we think an area has been remediated. The lab testing is taking about 3-4 weeks to process following the collection. This report will be updated as areas are addressed.

If you have any specific questions during the process, please don't hesitate to contact me directly. Thank you for your patience and understanding during the process.

Chad C. Groff
Superintendent of Schools
607-545-6421
