

Canaseraga Central School District
Water Testing Results
August 2019 Summary

The information included in this report detail the laboratory results from water samples taken from locations in the school district building. Any sample results with a reading of greater than **0.015** signifies a lead content beyond the NYS approved limit for school districts.

The results contained in this report detail the actions taken by the district to address the higher than acceptable lead levels at particular locations in the building. Locations that had acceptable levels during the first testing are not reported here.

If you have any specific questions during the process, please don't hesitate to contact me directly. Thank you for your patience and understanding during the process.

Chad C. Groff
Superintendent of Schools
607-545-6421
